

REVOLUTION GRAND

INNOVATION REALIZED

Backed by the Neutrino Group's expertise in building the most powerful and adaptable reporting products, the Revolution Grand combines the traditional court reporting features you demand with the innovation and seductiveness you adore.

POWERFUL OPTIONS

With the traditional features including note's storage, unparalleled compatibility, and exceptional battery life the Revolution Grand is perfectly configured to meet your performance, mobility, and communication needs.

ULTRA-COMFORTABLE DESIGN

Luxuriously sleek, the Revolution Grand was designed ergonomically to maximize your comfort and is the only court reporting machine prescribed by doctors to reduce unnecessary pain and injuries common with traditional machines.

INNOVATION REALIZED

Integrated ultra-mobile PC integration, WiFi and Bluetooth connectivity, Dual Assisted Stroke technology, and Integrated Audio Recording are just a few of the featured built into the Revolution Grand. Visit our website to see all the accessories designed to enhance the performance, look, and convenience of your Revolution Grand.

TESTIMONIALS

The Neutrino Gemini has clearly proven to be a solid, quiet, stable machine with an absolutely effortless touch. I've been using my Gemini in the courtroom for over four years with not the first problem or issue. I'd never return to a legacy writer -- never. My shoulder pain completely vanished once I started using this wonderful machine.

Joseph A. Millikan, CM-FCRR
Official United States Court Reporter
Southern District of Florida

For 25 years I was a court reporter, and for the last 10 I've worked as a CART provider/captioner. A year ago I thought my reporting career was ending due to the shooting pain I had in my forearms. I couldn't work, and I couldn't enjoy the hobbies I loved. And I was afraid that continuing to work would mean living with pain even after I retired.

I heard about Gemini machines and decided to give their ergonomic design a try.

I travel internationally for work, so it was necessary to have a machine that I could travel with. My Gemini is wonderful. It is light, and fits easily into my carry-on bag. The keys haven't gone out of adjustment from all the bumps that come with traveling, and I've noticed it's easier to get through security.

I could not possibly be happier with my Gemini. It has everything I need to do my job well, and it's allowed me to continue with my career. Anyone looking for a machine, CART or captioners, should consider a Gemini.

Teri Darrenougue

REVOLUTION GRAND GOLD PACKAGE

Designed with Deposition
Reporters, In Court room
Reporters, Captioners, Court
Providers in mind

The Revolution Gold package is a Crème de la Crème of court reporting machines with the largest screen of any machine at over 21 Sq" , built in CD Quality audio recording, Dual Class One Bluetooth connectivity (300ft range), integrated and extremely accurate battery life gauge, on-board translation, and the mega feature of being able to run your CAT software directly on the machine. It maintains the 3-D pivoting action and adds an almost infinitely tiltable and twistable display, to its independent 3-D pivoting design along with the and patent pending DAS (dual assisted stroke), this unique machine offers a level of features not to be out classed nor out matched by any other machine.

REVOLUTION GRAND SILVER PACKAGE

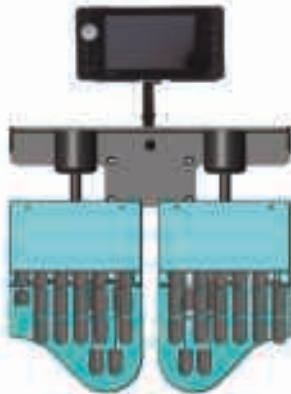

Designed with Deposition Reporters, In Court room Reporters, Captioners, Cart Providers in mind

The Revolution Silver package is a small, lightweight unit that will give you all the power you can handle built in our smallest court ready product, built-in CD Quality audio recording, Dual Class One Bluetooth connectivity (300ft range), integrated and extremely accurate battery life gauge, on-board translation, and the mega feature of being able to run your CAT software directly on the machine. It maintains the 3-D pivoting action on the machine and adds an almost infinitely tiltable and twistable display, its independent 3-D pivoting action and patent-pending DAS (Dual Assisted Stroke), this unique machine will provide a very natural, easy transition for those reporters seeking relief from the stress and strain caused by a traditional machine, but who also want to keep that same articulated feel and design.

While its screen will be significantly smaller than the Tablet Kiosk in the gold package, its offsetting advantage will be it's smaller and lighter weight design, weighing in at approximately 4.2 lbs, giving it the unsurpassed title of lightest, fully functional machine on the planet.

Starting at:
\$4495.00

KEY FEATURES

The lightest fully functioning steno machine on the market!

- Ergonomic
- Small Ultra Light Screen displays strokes, text or both.
- 3 Electronic Backups (expandable up to 7 backups)
- Lightweight 4.2 lbs design
- Onboard Audio Recording
- Built in Class One Dual Bluetooth
- USB and Serial options as well
- Fully Optical (never goes out of adjustment)
- Ultimate adjustability (means ultimate stacking prevention)
- 30 gig Hard drive (primary storage)
- Two One Gig Flash Drives (Second and third backups)
- LCD battery indicator
- 500 megahertz processor
- Compatible with All Major CAT
- Traditional touch
- Silent Operation
- Available in 32 different colors
- 1-Year Manufacturer Warranty

REVOLUTION GRAND BRONZE PACKAGE

Designed with Deposition
Reporters, In Court room
Reporters, Captioners, Court
Providers in mind

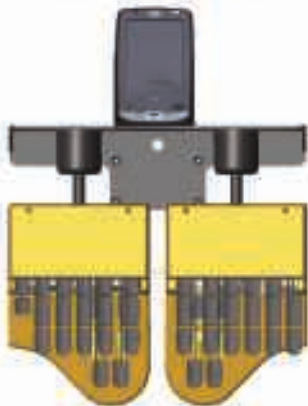

The Revolution Bronze package is our lightest court ready product. With its independent 3-D pivoting action and patent-pending DAS (Dual Assisted Stroke), this unique machine will provide a very natural, easy transition for those reporters seeking relief from the stress and strain caused by a traditional machine, but who also want to keep that same articulated feel and design.

This Revolution Bronze package gives you the lightest weight court machine on the market today. The PDA backup system via our attached HP IPAQ PDA with our custom software application, StenoSync, gives you four independent electronic backups which can be read in by any major CAT software. The Revolution Bronze package also supplies you with our unique Dual Class One (300 feet) Bluetooth connection from your machine to your laptops. Along with our LCD battery gauge, you will know exactly where you stand on Power.

The Revolution Bronze Court package does not record audio and does not provide onscreen translation. For these features please see the Revolution Court Silver and Gold Packages.

KEY FEATURES

Four electronic backups at under 4lbs.

- Ergonomic
- Lightweight 3.9 lbs design
- Built in Class One Dual Bluetooth
- USB and Serial options as well
- Fully Optical (never goes out of adjustment)
- Ultimate adjustability (means ultimate stacking prevention)
- LCD battery indicator
- 35 hours of run time on a single charge (upgradeable to 70)
- Universal power supply
- Compatible with All Major CAT
- Traditional touch
- Silent Operation
- Available in 32 different colors
- 1-Year Manufacturer Warranty

REVOLUTION GRAND CAPTIONER'S PACKAGE

Designed with the Captioner
and Cart Provider in mind.

The captioner's package provides all the benefits and ergonomic design of the Gemini Revolution in a non redundant environment, meaning no backup system, but it does include the Class One Dual Bluetooth capability. With its independent 3-D pivoting action and patent-pending DAS (Dual Assisted Stroke), this unique machine will provide a very natural, easy transition for those reporters seeking relief from the stress and strain caused by a traditional machine, but who also want to keep that same articulated feel and design.

While being ultra lightweight, 3.4 lbs, and offering upgradeability should you need or want to add our unique backup system, the Revolution Captioner's machine also offers an unsurpassed battery life at over 35 hours on a single charge, and a built-in LCD indicator will give you an exact readout of where your battery is in terms of its charge at a glance.

KEY FEATURES

Finally, a healthy alternative for all those long days captioning!

- Ergonomic
- Lightweight 3.9 lbs design
- Built in Class One Dual Bluetooth
- USB and Serial options as well
- Fully Optical (never goes out of adjustment)
- Ultimate adjustability (means ultimate stacking prevention)
- LCD battery indicator
- 35 hours of run time on a single charge (upgradeable to 70)
- Universal power supply
- Compatible with All Major CAT
- Traditional touch
- Silent Operation
- Available in 32 different colors
- 1-Year Manufacturer Warranty

EVOLUTION GRAND ECONOMY PACKAGE

Designed with the data entry person in mind. A great entry level product.

The Evolution Economy package is our lowest cost traditional feel model and an entry-level product. With its independent 3-D pivoting action and patent-pending DAS (Dual Assisted Stroke), this unique machine will provide a very natural, easy transition for reporters seeking relief from the stress and strain caused by a traditional machine, but who want to keep that same articulated feel and design.

This machine is a realtime only product and requires both being plugged in and connection via serial cable. This model does not support wireless and offers a very limited battery.

The Evolution Economy package works well for medical transcribers and other data entry positions. It is not recommended for Captioners, CART providers, or Court Reporters.
